| Product Type:                | shRNA Plasmids  |
|------------------------------|---|
| Product Name:                | Prickle1 Mouse shRNA Plasmid (Locus ID 106042)  |
| Locus ID:                    | 106042  |
| Synonyms:                    | 1110058P22Rik; AW215793; b2b019Clo; mpk1; Prickle   |
| Vector:                      | pGFP-V-RS (TR30007)   |
| E. coli Selection:           | Kanamycin   |
| Mammalian Cell<br>Selection: | Puromycin   |
| Format:                      | Retroviral plasmids   |
| Components:                  | Prickle1 - Mouse, 4 unique 29mer shRNA constructs in retroviral GFP vector(Gene ID =<br>106042). 5µg purified plasmid DNA per construct<br>29-mer scrambled shRNA cassette in pGFP-V-RS Vector, TR30013, included for free.   |
| RefSeq:                      | <u>BC117892, BC117893, NM_001033217, NM_001033217.2, NM_001033217.3, NM_001033217.4,</u><br><u>BC022643, BC023970, NM_001364846, NM_001033217.5</u>   |
| UniProt ID:                  | <u>Q3U5C7</u>   |
| Summary:                     | Involved in the planar cell polarity pathway that controls convergent extension during gastrulation and neural tube closure (By similarity). Convergent extension is a complex morphogenetic process during which cells elongate, move mediolaterally, and intercalate between neighboring cells, leading to convergence toward the mediolateral axis and extension along the anteroposterior axis. Necessary for nuclear localization of REST. May serve as nuclear receptor (By similarity).[UniProtKB/Swiss-Prot Function] |
| shRNA Design:                | These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **CRIGENE** Prickle1 Mouse shRNA Plasmid (Locus ID 106042) – TG505738

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
