Mannosidase II (MAN2A1) Human shRNA Lentiviral Particle (Locus ID 4124)

Product data:

Product Type: shRNA Lentiviral Particles

Product Name: Mannosidase II (MAN2A1) Human shRNA Lentiviral Particle (Locus ID 4124)

Locus ID: 4124

Synonyms: AMan II; GOLIM7; MANA2; MANII

Vector: pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

Components: MAN2A1 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1

scramble control), 0.5 ml each, >10^7 TU/ml.

RefSeq: NM 002372, NM 002372.1, NM 002372.2, NM 002372.3, BC031659, BC043416, BC111062,

BC142656, BC142696

UniProt ID: Q16706

Summary: This gene encodes a glycosyl hydrolase that localizes to the Golgi and catalyzes the final

hydrolytic step in the asparagine-linked oligosaccharide (N-glycan) maturation pathway. Mutations in the mouse homolog of this gene have been shown to cause a systemic

autoimmune disease similar to human systemic lupus erythematosus. [provided by RefSeq,

Dec 2013]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

Mannosidase II (MAN2A1) Human shRNA Lentiviral Particle (Locus ID 4124) - TL200467V

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
