

Product datasheet for **TL300551V**

VPS37A Human shRNA Lentiviral Particle (Locus ID 137492)

Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	VPS37A Human shRNA Lentiviral Particle (Locus ID 137492)
Locus ID:	137492
Synonyms:	HCRP1; PQBP2; SPG53
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	VPS37A - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 ⁷ TU/ml.
RefSeq:	NM_001145152 , NM_152415 , NM_152415.1 , NM_152415.2 , NM_001145152.1 , BC067754 , BC067754.1 , BC022363 , NM_001363167 , NM_001363168 , NM_001363171 , NM_001363172 , NM_001363173 , NM_001363169 , NM_001363170 , NM_152415.3
UniProt ID:	Q8NEZ2
Summary:	This gene belongs to the VPS37 family, and encodes a component of the ESCRT-I (endosomal sorting complex required for transport I) protein complex, required for the sorting of ubiquitinated transmembrane proteins into internal vesicles of multivesicular bodies. Expression of this gene is downregulated in hepatocellular carcinoma, and mutations in this gene are associated with autosomal recessive spastic paraplegia-53. A related pseudogene has been identified on chromosome 5. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Dec 2012]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com . If you need a special design or shRNA sequence, please utilize our custom shRNA service .

**Performance
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
