

Product datasheet for TL301076V

TLR9 Human shRNA Lentiviral Particle (Locus ID 54106)

Product data:

| Product Type: | shRNA Lentiviral Particles |
|---------------|--|
| Product Name: | TLR9 Human shRNA Lentiviral Particle (Locus ID 54106) |
| Locus ID: | 54106 |
| Synonyms: | CD289 |
| Vector: | pGFP-C-shLenti (TR30023) |
| Format: | Lentiviral particles |
| Components: | TLR9 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml. |
| RefSeq: | <u>NM_017442</u> , <u>NM_138688</u> , <u>NM_017442.1</u> , <u>NM_017442.2</u> , <u>NM_017442.3</u> , <u>NM_138688.1</u> , <u>BC032713</u> , <u>BC032713.1</u> |
| UniProt ID: | <u>Q9NR96</u> |
| Summary: | The protein encoded by this gene is a member of the Toll-like receptor (TLR) family, which plays a fundamental role in pathogen recognition and activation of innate immunity. TLRs are |
| | highly conserved from Drosophila to humans and share structural and functional similarities. They recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious agents, and mediate the production of cytokines necessary for the development of effective immunity. Studies in mice and human indicate that this receptor mediates cellular response to unmethylated CpG dinucleotides in bacterial DNA to mount an innate immune response. [provided by RefSeq, Aug 2017] |

GRIGENE TLR9 Human shRNA Lentiviral Particle (Locus ID 54106) – TL301076V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
