Product datasheet for TL301873

Rotatin (RTTN) Human shRNA Plasmid Kit (Locus ID 25914)

Product data:

Product Type:	shRNA Plasmids
Product Name:	Rotatin (RTTN) Human shRNA Plasmid Kit (Locus ID 25914)
Locus ID:	25914
Synonyms:	MSSP
Vector:	pGFP-C-shLenti (TR30023)
E. coli Selection:	Chloramphenicol (34 ug/ml)
Mammalian Cell Selection:	Puromycin
Format:	Lentiviral plasmids
Components:	RTTN - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 25914). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.
RefSeq:	<u>BC013774</u> , <u>NM_001318520</u> , <u>NM_173630</u> , <u>NM_173630.1</u> , <u>NM_173630.2</u> , <u>NM_173630.3</u> , <u>BC007359</u> , <u>BC026879</u> , <u>BC046222</u> , <u>BC046931</u> , <u>BC047602</u> , <u>BC143723</u> , <u>BC156291</u>
UniProt ID:	<u>Q86VV8</u>
Summary:	This gene encodes a large protein whose specific function is unknown. Absence of the orthologous protein in mouse results in embryonic lethality with deficient axial rotation, abnormal differentiation of the neural tube, and randomized looping of the heart tube during development. In human, mutations in this gene are associated with polymicrogyria with seizures. In human fibroblasts this protein localizes at the ciliary basal bodies. Given the intracellular localization of this protein and the phenotypic effects of mutations, this gene is suspected of playing a role in the maintenance of normal ciliary structure which in turn effects the development. [provided by RefSeq, Jan 2013]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Rotatin (RTTN) Human shRNA Plasmid Kit (Locus ID 25914) – TL301873						

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
