

## Product datasheet for **TL302456V**

### PLA2G3 Human shRNA Lentiviral Particle (Locus ID 50487)

#### Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	PLA2G3 Human shRNA Lentiviral Particle (Locus ID 50487)
Locus ID:	50487
Synonyms:	GIII-SPLA2; sPLA2-III; SPLA2III
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	PLA2G3 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 <sup>7</sup> TU/ml.
RefSeq:	<a href="#">NM_015715</a> , <a href="#">NM_015715.1</a> , <a href="#">NM_015715.2</a> , <a href="#">NM_015715.3</a> , <a href="#">NM_015715.4</a> , <a href="#">BC025316</a> , <a href="#">BC025316.1</a> , <a href="#">NM_015715.5</a>
UniProt ID:	<a href="#">Q9NZ20</a>
Summary:	This gene encodes a protein that belongs to the secreted phospholipase A2 family, whose members include the bee venom enzyme. The encoded enzyme functions in lipid metabolism and catalyzes the calcium-dependent hydrolysis of the sn-2 acyl bond of phospholipids to release arachidonic acid and lysophospholipids. This enzyme acts as a negative regulator of ciliogenesis, and may play a role in cancer development by stimulating tumor cell growth and angiogenesis. This gene is associated with oxidative stress, and polymorphisms in this gene are linked to risk for Alzheimer's disease. [provided by RefSeq, Apr 2014]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <a href="mailto:techsupport@origene.com">techsupport@origene.com</a> . If you need a special design or shRNA sequence, please utilize our <a href="#">custom shRNA service</a> .

**Performance  
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

**Product images:**

GFP signal was observed under microscope at 48 hours after transduction of TL302456A virus into HEK293 cells. TL302456A virus was prepared using lenti-shRNA TL302456A and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of TL302456B virus into HEK293 cells. TL302456B virus was prepared using lenti-shRNA TL302456B and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL302456C] virus into HEK293 cells. [TL302456C] virus was prepared using lenti-shRNA [TL302456C] and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL302456D] virus into HEK293 cells. [TL302456D] virus was prepared using lenti-shRNA [TL302456D] and [TR30037] packaging kit.
