

## Product datasheet for **TL302564V**

### PDGFC Human shRNA Lentiviral Particle (Locus ID 56034)

#### Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	PDGFC Human shRNA Lentiviral Particle (Locus ID 56034)
Locus ID:	56034
Synonyms:	FALLOTEIN; SCDGF
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	PDGFC - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 <sup>7</sup> TU/ml.
RefSeq:	<a href="#">NM_016205</a> , <a href="#">NR_036641</a> , <a href="#">NM_016205.1</a> , <a href="#">NM_016205.2</a> , <a href="#">BC041783</a> , <a href="#">BC051876</a> , <a href="#">BC094746</a> , <a href="#">BC136662</a> , <a href="#">BC144348</a> , <a href="#">NM_016205.3</a>
UniProt ID:	<a href="#">Q9NRA1</a>
Summary:	The protein encoded by this gene is a member of the platelet-derived growth factor family. The four members of this family are mitogenic factors for cells of mesenchymal origin and are characterized by a core motif of eight cysteines. This gene product appears to form only homodimers. It differs from the platelet-derived growth factor alpha and beta polypeptides in having an unusual N-terminal domain, the CUB domain. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Sep 2010]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <a href="mailto:techsupport@origene.com">techsupport@origene.com</a> . If you need a special design or shRNA sequence, please utilize our <a href="#">custom shRNA service</a> .

**Performance  
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
