# Product datasheet for TL302804V

### **OLFML3 Human shRNA Lentiviral Particle (Locus ID 56944)**

## **Product data:**

Product Type:	shRNA Lentiviral Particles
Product Name:	OLFML3 Human shRNA Lentiviral Particle (Locus ID 56944)
Locus ID:	56944
Synonyms:	HNOEL-iso; OLF44
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	OLFML3 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	<u>NM 001286352, NM 001286353, NM 020190, NM 020190.1, NM 020190.2, NM 020190.3, NM 020190.3, NM 020190.4, NM 001286353.1, NM 001286353.2, NM 001286352.1, BC009920, BC009920.2, NM 001286352.3, NM 020190.5</u>
UniProt ID:	<u>Q9NRN5</u>
UniProt ID: Summary:	<u>Q9NRN5</u> This gene encodes a member of the olfactomedin-like gene family which also includes genes encoding noelin, tiarin, myocilin, amassin, optimedin, photomedin, and latrophilin. The encoded protein is a secreted extracellular matrix glycoprotein with a C-terminal olfactomedin domain that facilitates protein-protein interactions, cell adhesion, and intercellular interactions. It serves as both a scaffold protein that recruits bone morphogenetic protein 1 to its substrate chordin, and as a vascular tissue remodeler with pro-angiogenic properties. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2017]

#### CRIGENE OLFML3 Human shRNA Lentiviral Particle (Locus ID 56944) – TL302804V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
