

Product datasheet for **TL303064V**

Myozenin 2 (MYOZ2) Human shRNA Lentiviral Particle (Locus ID 51778)

Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	Myozenin 2 (MYOZ2) Human shRNA Lentiviral Particle (Locus ID 51778)
Locus ID:	51778
Synonyms:	C4orf5; CMH16; CS-1; FATZ-2
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	MYOZ2 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 ⁷ TU/ml.
RefSeq:	NM_016599 , NM_016599.2 , NM_016599.3 , NM_016599.4 , BC017402 , BC017402.1 , BC005195 , BC020932 , BM091578 , NM_016599.5
UniProt ID:	Q9NPC6
Summary:	The protein encoded by this gene belongs to a family of sarcomeric proteins that bind to calcineurin, a phosphatase involved in calcium-dependent signal transduction in diverse cell types. These family members tether calcineurin to alpha-actinin at the z-line of the sarcomere of cardiac and skeletal muscle cells, and thus they are important for calcineurin signaling. Mutations in this gene cause cardiomyopathy familial hypertrophic type 16, a hereditary heart disorder. [provided by RefSeq, Aug 2011]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com . If you need a special design or shRNA sequence, please utilize our custom shRNA service .

**Performance
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
