Product datasheet for TL303079V

MYH7B Human shRNA Lentiviral Particle (Locus ID 57644)

Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	MYH7B Human shRNA Lentiviral Particle (Locus ID 57644)
Locus ID:	57644
Synonyms:	MHC14; MYH14
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	MYH7B - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	<u>NM_020884, NM_033424, NM_020884.1, NM_020884.2, NM_020884.3, NM_020884.4, BC007808, BC069327, BC069406, BC151242</u>
UniProt ID:	<u>A7E2Y1</u>
Summary:	The myosin II molecule is a multi-subunit complex consisting of two heavy chains and four light chains. This gene encodes a heavy chain of myosin II, which is a member of the motor-domain superfamily. The heavy chain includes a globular motor domain, which catalyzes ATP hydrolysis and interacts with actin, and a tail domain in which heptad repeat sequences promote dimerization by interacting to form a rod-like alpha-helical coiled coil. This heavy chain subunit is a slow-twitch myosin. Alternatively spliced transcript variants have been found, but the full-length nature of these variants is not determined. [provided by RefSeq, Mar 2010]

GRIGENE MYH7B Human shRNA Lentiviral Particle (Locus ID 57644) – TL303079V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
