Product datasheet for TL303700V

KIF13B Human shRNA Lentiviral Particle (Locus ID 23303)

Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	KIF13B Human shRNA Lentiviral Particle (Locus ID 23303)
Locus ID:	23303
Synonyms:	GAKIN
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	KIF13B - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	<u>NM_015254, NM_015254.1, NM_015254.2, NM_015254.3, BC005977, BC014350, BC028056, BC0280566, BC0280566, BC0280566, BC0280566, B</u>
UniProt ID:	<u>Q9NQT8</u>
Summary:	Involved in reorganization of the cortical cytoskeleton. Regulates axon formation by promoting the formation of extra axons. May be functionally important for the intracellular trafficking of MAGUKs and associated protein complexes.[UniProtKB/Swiss-Prot Function]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE KIF13B Human shRNA Lentiviral Particle (Locus ID 23303) – TL303700V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
