

## Product datasheet for **TL304471V**

### FOXP1 Human shRNA Lentiviral Particle (Locus ID 27086)

#### Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	FOXP1 Human shRNA Lentiviral Particle (Locus ID 27086)
Locus ID:	27086
Synonyms:	12CC4; hFKH1B; HSPC215; MFH; QRF1
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	FOXP1 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 <sup>7</sup> TU/ml.

UniProt ID:	<a href="#">Q9H334</a>
Summary:	This gene belongs to subfamily P of the forkhead box (FOX) transcription factor family. Forkhead box transcription factors play important roles in the regulation of tissue- and cell type-specific gene transcription during both development and adulthood. Forkhead box P1 protein contains both DNA-binding- and protein-protein binding-domains. This gene may act as a tumor suppressor as it is lost in several tumor types and maps to a chromosomal region (3p14.1) reported to contain a tumor suppressor gene(s). Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Jul 2008]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <a href="mailto:techsupport@origene.com">techsupport@origene.com</a> . If you need a special design or shRNA sequence, please utilize our <a href="#">custom shRNA service</a> .

**Performance  
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

**Product images:**

GFP signal was observed under microscope at 48 hours after transduction of TL304471A virus into HEK293 cells. TL304471A virus was prepared using lenti-shRNA TL304471A and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of TL304471B virus into HEK293 cells. TL304471B virus was prepared using lenti-shRNA TL304471B and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL304471C] virus into HEK293 cells. [TL304471C] virus was prepared using lenti-shRNA [TL304471C] and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL304471D] virus into HEK293 cells. [TL304471D] virus was prepared using lenti-shRNA [TL304471D] and [TR30037] packaging kit.
