

## Product datasheet for **TL305329V**

### CNN2 Human shRNA Lentiviral Particle (Locus ID 1265)

#### Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	CNN2 Human shRNA Lentiviral Particle (Locus ID 1265)
Locus ID:	1265
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	CNN2 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 <sup>7</sup> TU/ml.
RefSeq:	<a href="#">NM_001303499</a> , <a href="#">NM_001303501</a> , <a href="#">NM_004368</a> , <a href="#">NM_201277</a> , <a href="#">NM_201277.1</a> , <a href="#">NM_201277.2</a> , <a href="#">NM_004368.1</a> , <a href="#">NM_004368.2</a> , <a href="#">NM_004368.3</a> , <a href="#">BC141818</a> , <a href="#">BC141833</a> , <a href="#">BC148264</a> , <a href="#">BM976651</a> , <a href="#">NM_201277.3</a> , <a href="#">NM_004368.4</a>
UniProt ID:	<a href="#">Q99439</a>
Summary:	The protein encoded by this gene, which can bind actin, calmodulin, troponin C, and tropomyosin, may function in the structural organization of actin filaments. The encoded protein could play a role in smooth muscle contraction and cell adhesion. Several pseudogenes of this gene have been identified, and are present on chromosomes 1, 2, 3, 6, 9, 11, 13, 15, 16, 21 and 22. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Jan 2015]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <a href="mailto:techsupport@origene.com">techsupport@origene.com</a> . If you need a special design or shRNA sequence, please utilize our <a href="#">custom shRNA service</a> .

**Performance  
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
