ADO Human shRNA Lentiviral Particle (Locus ID 84890)

Product data:

Product Type: shRNA Lentiviral Particles

Product Name: ADO Human shRNA Lentiviral Particle (Locus ID 84890)

Locus ID: 84890

Synonyms: C10orf22

Vector: pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

Components: ADO - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble

control), 0.5 ml each, >10^7 TU/ml.

RefSeg: NM 032804, NM 032804.1, NM 032804.2, NM 032804.3, NM 032804.4, NM 032804.5,

BC028589, BC028589.2, BC018660, BC067740

UniProt ID: Q96SZ5

Summary: Human thiol dioxygenases include cysteine dioxygenase (CDO; MIM 603943) and cysteamine

(2-aminoethanethiol) dioxygenase (ADO; EC 1.13.11.19). CDO adds 2 oxygen atoms to free cysteine, whereas ADO adds 2 oxygen atoms to free cysteamine to form hypotaurine (Dominy

et al., 2007 [PubMed 17581819]).[supplied by OMIM, Mar 2008]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
