## Product datasheet for TL306727V

## Angiomotin like 1 (AMOTL1) Human shRNA Lentiviral Particle (Locus ID 154810)

## **Product data:**

Product Type:	shRNA Lentiviral Particles
Product Name:	Angiomotin like 1 (AMOTL1) Human shRNA Lentiviral Particle (Locus ID 154810)
Locus ID:	154810
Synonyms:	JEAP
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	AMOTL1 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	<u>NM_001301007, NM_130847, NM_130847.1, NM_130847.2, NM_001301007.1, BC037539,</u> BC037539.1, BC014126, BC018449, BC040683, NM_001301007.2, NM_130847.3
UniProt ID:	<u>Q8IY63</u>
Summary:	The protein encoded by this gene is a peripheral membrane protein that is a component of tight junctions or TJs. TJs form an apical junctional structure and act to control paracellular permeability and maintain cell polarity. This protein is related to angiomotin, an angiostatin binding protein that regulates endothelial cell migration and capillary formation. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2014]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Angiomotin like 1 (AMOTL1) Human shRNA Lentiviral Particle (Locus ID 154810) – TL306727V
Performance	OriGene guarantees that the sequences in the shRNA expression cassettes are verified to
Guaranteed:	correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to
	evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly

be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

assess knockdown, the gene expression level from the included scramble control vector must
