

## Product datasheet for **TL307748V**

### Laeverin (LVRN) Human shRNA Lentiviral Particle (Locus ID 206338)

#### Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	Laeverin (LVRN) Human shRNA Lentiviral Particle (Locus ID 206338)
Locus ID:	206338
Synonyms:	APQ; AQPEP; TAQPEP
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	AQPEP - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 <sup>7</sup> TU/ml.
RefSeq:	<a href="#">NM_173800</a> , <a href="#">NM_173800.1</a> , <a href="#">NM_173800.2</a> , <a href="#">NM_173800.3</a> , <a href="#">NM_173800.4</a> , <a href="#">BC036440</a> , <a href="#">BC045809</a> , <a href="#">BC060869</a> , <a href="#">BC068560</a> , <a href="#">BC070028</a> , <a href="#">BC094716</a> , <a href="#">BC109022</a> , <a href="#">BC109023</a>
UniProt ID:	<a href="#">Q6Q4G3</a>
Summary:	Metalloprotease which may be important for placentation by regulating biological activity of key peptides at the embryo-maternal interface. On synthetic substrates it shows a marked preference for Leu-4-methylcoumaryl-7-amide (Leu-MCA) over Met-MCA, Arg-LCA and Lys-LCA. Cleaves the N-terminal amino acid of several peptides such as angiotensin-3, kisspeptin-10 and endokinin C.[UniProtKB/Swiss-Prot Function]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <a href="mailto:techsupport@origene.com">techsupport@origene.com</a> . If you need a special design or shRNA sequence, please utilize our <a href="#">custom shRNA service</a> .

**Performance  
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

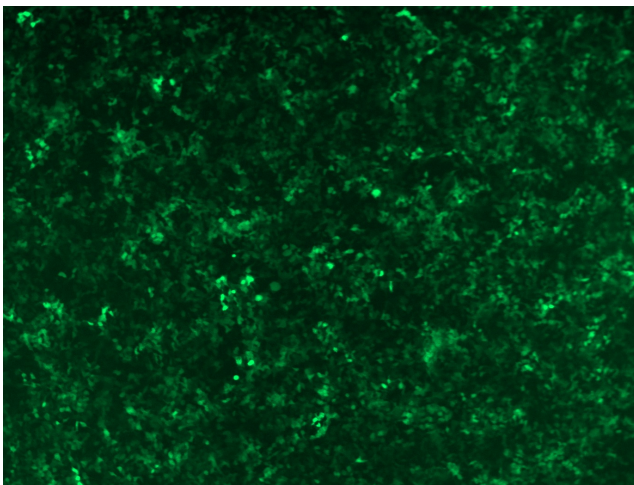

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

**Product images:**

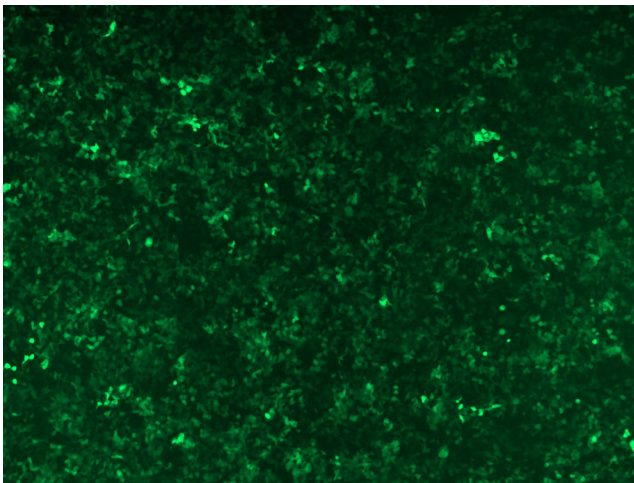

GFP signal was observed under microscope at 48 hours after transduction of TL307748A virus into HEK293 cells. TL307748A virus was prepared using lenti-shRNA TL307748A and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of TL307748B virus into HEK293 cells. TL307748B virus was prepared using lenti-shRNA TL307748B and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL307748C] virus into HEK293 cells. [TL307748C] virus was prepared using lenti-shRNA [TL307748C] and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL307748D] virus into HEK293 cells. [TL307748D] virus was prepared using lenti-shRNA [TL307748D] and [TR30037] packaging kit.
