

## Product datasheet for **TL308320**

### YY1 Human shRNA Plasmid Kit (Locus ID 7528)

#### Product data:

Product Type:	shRNA Plasmids
Product Name:	YY1 Human shRNA Plasmid Kit (Locus ID 7528)
Locus ID:	7528
Synonyms:	DELTA; GADEV5; INO80S; NF-E1; UCRBP; YIN-YANG-1
Vector:	pGFP-C-shLenti (TR30023)
E. coli Selection:	Chloramphenicol (34 ug/ml)
Mammalian Cell Selection:	Puromycin
Format:	Lentiviral plasmids
Components:	YY1 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 7528). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.
RefSeq:	<a href="#">NM_003403</a> , <a href="#">NM_003403.1</a> , <a href="#">NM_003403.2</a> , <a href="#">NM_003403.3</a> , <a href="#">NM_003403.4</a> , <a href="#">BC037308</a> , <a href="#">BC037308.1</a> , <a href="#">BC014138</a> , <a href="#">BC020324</a> , <a href="#">BC065366</a> , <a href="#">NM_003403.5</a>
UniProt ID:	<a href="#">P25490</a>
Summary:	YY1 is a ubiquitously distributed transcription factor belonging to the GLI-Kruppel class of zinc finger proteins. The protein is involved in repressing and activating a diverse number of promoters. YY1 may direct histone deacetylases and histone acetyltransferases to a promoter in order to activate or repress the promoter, thus implicating histone modification in the function of YY1. [provided by RefSeq, Jul 2008]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <a href="mailto:techsupport@origene.com">techsupport@origene.com</a> . If you need a special design or shRNA sequence, please utilize our <a href="#">custom shRNA service</a> .

**Performance  
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

**Product images:**

GFP signal was observed under microscope at 48 hours after transduction of TL308320A virus into HEK293 cells. TL308320A virus was prepared using lenti-shRNA TL308320A and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of TL308320B virus into HEK293 cells. TL308320B virus was prepared using lenti-shRNA TL308320B and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL308320D] virus into HEK293 cells. [TL308320D] virus was prepared using lenti-shRNA [TL308320D] and [TR30037] packaging kit.
