## Product datasheet for TL308350

## Xanthine Oxidase (XDH) Human shRNA Plasmid Kit (Locus ID 7498)

## **Product data:**

| Product Type:                | shRNA Plasmids  |
|------------------------------|---|
| Product Name:                | Xanthine Oxidase (XDH) Human shRNA Plasmid Kit (Locus ID 7498)  |
| Locus ID:                    | 7498  |
| Synonyms:                    | XAN1; XO; XOR   |
| Vector:                      | pGFP-C-shLenti (TR30023)  |
| E. coli Selection:           | Chloramphenicol (34 ug/ml)  |
| Mammalian Cell<br>Selection: | Puromycin   |
| Format:                      | Lentiviral plasmids   |
| Components:                  | XDH - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 7498). 5µg<br>purified plasmid DNA per construct<br>29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.   |
| RefSeq:                      | <u>NM 000379, NM 000379.1, NM 000379.2, NM 000379.3, BC166696, NM 000379.4</u>  |
| UniProt ID:                  | <u>P47989</u>   |
| Summary:                     | Xanthine dehydrogenase belongs to the group of molybdenum-containing hydroxylases<br>involved in the oxidative metabolism of purines. The encoded protein has been identified as<br>a moonlighting protein based on its ability to perform mechanistically distinct functions.<br>Xanthine dehydrogenase can be converted to xanthine oxidase by reversible sulfhydryl<br>oxidation or by irreversible proteolytic modification. Defects in xanthine dehydrogenase<br>cause xanthinuria, may contribute to adult respiratory stress syndrome, and may potentiate<br>influenza infection through an oxygen metabolite-dependent mechanism. [provided by<br>RefSeq, Jan 2014] |
| shRNA Design:                | These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> .<br>If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| ORIGENE | Xanthine Oxidase (XDH) Human shRNA Plasmid Kit (Locus ID 7498) – TL30 | 8350 |
|---------|---|------|
|---------|---|------|

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
