## **TAX1BP1 Human shRNA Plasmid Kit (Locus ID 8887)**

**Product data:** 

**Product Type:** shRNA Plasmids

Product Name: TAX1BP1 Human shRNA Plasmid Kit (Locus ID 8887)

Locus ID: 8887

Synonyms: CALCOCO3; T6BP; TXBP151

Vector: pGFP-C-shLenti (TR30023)

E. coli Selection: Chloramphenicol (34 ug/ml)

**Mammalian Cell** 

Selection:

Puromycin

Format: Lentiviral plasmids

**Components:** TAX1BP1 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 8887).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

**RefSeq:** NM 001079864, NM 001206901, NM 001206902, NM 006024, NM 006024.1, NM 006024.2,

NM 006024.3, NM 006024.4, NM 006024.5, NM 006024.6, NM 001079864.1,

NM 001079864.2, NM 001206902.1, NM 001206901.1, BC050358, BC050358.2, BC024600,

NM 001362794, NM 001362795, NM 001079864.3

UniProt ID: Q86VP1

Summary: This gene encodes a HTLV-1 tax1 binding protein. The encoded protein interacts with

TNFAIP3, and inhibits TNF-induced apoptosis by mediating the TNFAIP3 anti-apoptotic activity. Degradation of this protein by caspase-3-like family proteins is associated with apoptosis induced by TNF. This protein may also have a role in the inhibition of inflammatory

signaling pathways. Alternatively spliced transcript variants encoding different isoforms have

been found for this gene.[provided by RefSeq, May 2011]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

## Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
