## Product datasheet for TL309030

## Syntaxin 4 (STX4) Human shRNA Plasmid Kit (Locus ID 6810)

## Product data:

Product Type:
Product Name:
Locus ID:
Synonyms:
Vector:
E. coli Selection:

Mammalian Cell
Selection:
Format:
Components:

RefSeq:

UniProt ID:
Summary:
shRNA Design:
shRNA Plasmids
Syntaxin 4 (STX4) Human shRNA Plasmid Kit (Locus ID 6810)
6810
p35-2; STX4A
pGFP-C-shLenti (TR30023)
Chloramphenicol (34 ug/ml)
Puromycin

Lentiviral plasmids
STX4 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID $=6810$ ). $5 \mu \mathrm{~g}$ purified plasmid DNA per construct
29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.
NM 001272095 NM 001272096, NM 004604, NM 004604.1 NM 004604.2 NM 004604.3, NM 004604.4 NM 001272095.1 NM 001272096.1, BC002436, BC002436.2 NM 004604.5 Q12846

Plasma membrane t-SNARE that mediates docking of transport vesicles. Necessary for the translocation of SLC2A4 from intracellular vesicles to the plasma membrane. Together with STXB3 and VAMP2, may also play a role in docking/fusion of intracellular GLUT4-containing vesicles with the cell surface in adipocytes (By similarity). May also play a role in docking of synaptic vesicles at presynaptic active zones.[UniProtKB/Swiss-Prot Function]

These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

## Performance <br> Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with $100 \%$ identity. One of the four constructs at minimum are guaranteed to produce $70 \%$ or more gene expression knock-down provided a minimum transfection efficiency of $80 \%$ is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
