Cyclophilin F (PPIF) Human shRNA Lentiviral Particle (Locus ID 10105)

Product data:

Product Type: shRNA Lentiviral Particles

Product Name: Cyclophilin F (PPIF) Human shRNA Lentiviral Particle (Locus ID 10105)

Locus ID: 10105

Synonyms: Cyp-D; CyP-M; CYP3; CypD Vector: pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

Components: PPIF - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble

control), 0.5 ml each, >10^7 TU/ml.

RefSeq: NM 005729, NM 005729.1, NM 005729.2, NM 005729.3, BC005020, BC013204, BC110299,

NM 005729.4

UniProt ID: P30405

Summary: The protein encoded by this gene is a member of the peptidyl-prolyl cis-trans isomerase

(PPlase) family. PPlases catalyze the cis-trans isomerization of proline imidic peptide bonds in oligopeptides and accelerate the folding of proteins. This protein is part of the mitochondrial permeability transition pore in the inner mitochondrial membrane. Activation of this pore is thought to be involved in the induction of apoptotic and necrotic cell death. [provided by

RefSeq, Jul 2008]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

Cyclophilin F (PPIF) Human shRNA Lentiviral Particle (Locus ID 10105) - TL310249V

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
