

Product datasheet for **TL311316**

MYH10 Human shRNA Plasmid Kit (Locus ID 4628)

Product data:

Product Type:	shRNA Plasmids
Product Name:	MYH10 Human shRNA Plasmid Kit (Locus ID 4628)
Locus ID:	4628
Synonyms:	NMMHC-IIB; NMMHCB
Vector:	pGFP-C-shLenti (TR30023)
E. coli Selection:	Chloramphenicol (34 ug/ml)
Mammalian Cell Selection:	Puromycin
Format:	Lentiviral plasmids
Components:	MYH10 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 4628). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.
RefSeq:	NM_001256012 , NM_001256095 , NM_005964 , NM_005964.1 , NM_005964.2 , NM_005964.3 , NM_001256095.1 , NM_001256012.1 , BC000280 , BC008968 , BC117690 , BC117691 , BC144668 , BC150634
UniProt ID:	P35580
Summary:	This gene encodes a member of the myosin superfamily. The protein represents a conventional non-muscle myosin; it should not be confused with the unconventional myosin-10 (MYO10). Myosins are actin-dependent motor proteins with diverse functions including regulation of cytokinesis, cell motility, and cell polarity. Mutations in this gene have been associated with May-Hegglin anomaly and developmental defects in brain and heart. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Dec 2011]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com . If you need a special design or shRNA sequence, please utilize our custom shRNA service .

**Performance
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

Product images:

GFP signal was observed under microscope at 48 hours after transduction of TL311316A virus into HEK293 cells. TL311316A virus was prepared using lenti-shRNA TL311316A and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of TL311316B virus into HEK293 cells. TL311316B virus was prepared using lenti-shRNA TL311316B and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL311316C] virus into HEK293 cells. [TL311316C] virus was prepared using lenti-shRNA [TL311316C] and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL311316D] virus into HEK293 cells. [TL311316D] virus was prepared using lenti-shRNA [TL311316D] and [TR30037] packaging kit.
