

Product datasheet for TL312976

FKBP6 Human shRNA Plasmid Kit (Locus ID 8468)

Product data:

Product Type: shRNA Plasmids

Product Name: FKBP6 Human shRNA Plasmid Kit (Locus ID 8468)

Locus ID: 8468

FKBP36 Synonyms:

Vector: pGFP-C-shLenti (TR30023)

E. coli Selection: Chloramphenicol (34 ug/ml)

Mammalian Cell

Selection:

Puromycin

Format: Lentiviral plasmids

FKBP6 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 8468). Components:

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

NM 003602.4, NM 001135211.1, NM 001135211.2, NM 001281304.1, BC036817, BC036817.1,

NM 001362789, NM 001281304.2

UniProt ID: 075344

Summary: The protein encoded by this gene is a cis-trans peptidyl-prolyl isomerase that may function in

> immunoregulation and basic cellular processes involving protein folding and trafficking. This gene is located in a chromosomal region that is deleted in Williams-Beuren syndrome.

> Defects in this gene may cause male infertility. There are multiple pseudogenes for this gene located nearby on chromosome 7. Alternative splicing results in multiple transcript variants.

[provided by RefSeq, Jul 2013]

These shRNA constructs were designed against multiple splice variants at this gene locus. To shRNA Design:

be certain that your variant of interest is targeted, please contact techsupport@origene.com. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
