

# Product datasheet for TL314494V

## **BCKDHA Human shRNA Lentiviral Particle (Locus ID 593)**

## **Product data:**

Product Type:	shRNA Lentiviral Particles
Product Name:	BCKDHA Human shRNA Lentiviral Particle (Locus ID 593)
Locus ID:	593
Synonyms:	BCKDE1A; MSU; MSUD1; OVD1A
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	BCKDHA - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	<u>NM_000709</u> , <u>NM_001164783</u> , <u>NM_000709.1</u> , <u>NM_000709.2</u> , <u>NM_000709.3</u> , <u>NM_001164783.1</u> , <u>BC023983</u> , <u>BC023983.1</u> , <u>BC007878, BC008933</u> , <u>BM702667</u> , <u>NM_001164783.2</u> , <u>NM_000709.4</u>
UniProt ID:	<u>P12694</u>
Summary:	The branched-chain alpha-keto acid (BCAA) dehydrogenase (BCKD) complex is an innter mitochondrial enzyme complex that catalyzes the second major step in the catabolism of the branched-chain amino acids leucine, isoleucine, and valine. The BCKD complex consists of three catalytic components: a heterotetrameric (alpha2-beta2) branched-chain alpha-keto acid decarboxylase (E1), a dihydrolipoyl transacylase (E2), and a dihydrolipoamide dehydrogenase (E3). This gene encodes the alpha subunit of the decarboxylase (E1) component. Mutations in this gene result in maple syrup urine disease, type IA. Multiple transcript variants encoding different isoforms have been found for this gene.[provided by RefSeq, Sep 2009]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** BCKDHA Human shRNA Lentiviral Particle (Locus ID 593) – TL314494V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
