

## **Product datasheet for TL314838**

## i roduct datasneet for TES14030

**ALDH3B2 Human shRNA Plasmid Kit (Locus ID 222)** 

## Product data:

**Product Type:** shRNA Plasmids

Product Name: ALDH3B2 Human shRNA Plasmid Kit (Locus ID 222)

Locus ID: 222

Synonyms: ALDH8

Vector: pGFP-C-shLenti (TR30023)

**E. coli Selection:** Chloramphenicol (34 ug/ml)

**Mammalian Cell** 

Selection:

Puromycin

Format: Lentiviral plasmids

**Components:** ALDH3B2 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 222).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

RefSeq: NM 000695, NM 001031615, NM 001354345, NM 001031615.1, NM 000695.1, NM 000695.2,

NM 000695.3, BC007685, BC007685.2

**Summary:** This gene encodes a member of the aldehyde dehydrogenase family, a group of isozymes

that may play a major role in the detoxification of aldehydes generated by alcohol

metabolism and lipid peroxidation. The gene of this particular family member is over 10 kb in

length. Altered methylation patterns at this locus have been observed in spermatozoa derived from patients exhibiting reduced fecundity. [provided by RefSeq, Aug 2017]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

## Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
