

# Product datasheet for TL316700V

## **RPL18A Human shRNA Lentiviral Particle (Locus ID 6142)**

## **Product data:**

Product Type:	shRNA Lentiviral Particles
Product Name:	RPL18A Human shRNA Lentiviral Particle (Locus ID 6142)
Locus ID:	6142
Synonyms:	L18A
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	RPL18A - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	<u>NM_000980</u> , <u>NM_000980.1</u> , <u>NM_000980.2</u> , <u>NM_000980.3</u> , <u>BC066319</u> , <u>BC066319.1</u> , <u>BC007512</u> , <u>BC071920, NM_000980.4</u>
UniProt ID:	<u>Q02543</u>
Summary:	Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and
	a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a member of the L18AE family of ribosomal proteins that is a component of the 60S subunit. The encoded protein may play a role in viral replication by interacting with the hepatitis C virus internal ribosome entry site (IRES). This gene is co-transcribed with the U68 snoRNA, located within the third intron. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed throughout the genome. [provided by RefSeq, Jul 2012]

### **GRIGENE** RPL18A Human shRNA Lentiviral Particle (Locus ID 6142) – TL316700V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
