## **DPH3 Human shRNA Plasmid Kit (Locus ID 285381)**

**Product data:** 

**Product Type:** shRNA Plasmids

**Product Name:** DPH3 Human shRNA Plasmid Kit (Locus ID 285381)

**Locus ID:** 285381

**Synonyms:** DELGIP; DELGIP1; DESR1; DPH3A; KTI11; ZCSL2

Vector:pGFP-C-shLenti (TR30023)E. coli Selection:Chloramphenicol (34 ug/ml)

Mammalian Cell

Selection:

Puromycin

Format: Lentiviral plasmids

**Components:** DPH3 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 285381).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

RefSeq: BC010181, NM 001047434, NM 206831, NM 206831.1, NM 206831.2, NM 001047434.1,

NM 001047434.2, BC010181.2, BC073931, BC094863, NM 206831.3, NM 001047434.3

UniProt ID: Q96FX2

**Summary:** This gene encodes a CSL zinc finger-containing protein that is required for dipthamide

biosynthesis. The encoded protein is necessary for the initial step in the modification of a histidine residue in elongation factor-2 to diphthamide. This modified residue is a target for ADP ribosylation by the bacterial toxins diphtheria toxin and Pseudomonas exotoxin A. Alternative splicing results in multiple transcript variants that encode the same isoform.

[provided by RefSeq, Feb 2009]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

## Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
