

Product datasheet for TL320075

BEX2 Human shRNA Plasmid Kit (Locus ID 84707)

Product data:

Product Type: shRNA Plasmids

Product Name: BEX2 Human shRNA Plasmid Kit (Locus ID 84707)

Locus ID: 84707

Synonyms: BEX1; DJ79P11.1

Vector: pGFP-C-shLenti (TR30023)

E. coli Selection: Chloramphenicol (34 ug/ml)

Mammalian Cell

Selection:

Puromycin

Format: Lentiviral plasmids

Components: BEX2 - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 84707).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

RefSeq: NM 001168399, NM 001168400, NM 001168401, NM 032621, NM 032621.1, NM 032621.2,

NM 032621.3, NM 001168401.1, NM 001168400.1, NM 001168399.1, BC015522, BC015522.1,

BC050651, NM 032621.4, NM 001168401.2, NM 001168400.2

UniProt ID: Q9BXY8

Summary: This gene belongs to the brain expressed X-linked gene family. The encoded protein interacts

with the transcription factor LIM domain only 2 in a DNA-binding complex that recognizes the

E-box element and promotes transcription. This gene has been found to be a tumor suppressor that is silenced in human glioma. In breast cancer cells, this gene product modulates apoptosis in response to estrogen and tamoxifen, and enhances the anti-

proliferative effect of tamoxifen. Multiple transcript variants encoding different isoforms have

been found for this gene. [provided by RefSeq, Dec 2009]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
