# Product datasheet for TL320737V

## NUAK2 Human shRNA Lentiviral Particle (Locus ID 81788)

## **Product data:**

Product Type:	shRNA Lentiviral Particles
Product Name:	NUAK2 Human shRNA Lentiviral Particle (Locus ID 81788)
Locus ID:	81788
Synonyms:	SNARK
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	NUAK2 - Human shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	NM 030952, NM 030952.1, NM 030952.2, BC017306, BC017306.2
UniProt ID:	<u>Q9H093</u>
Summary:	Stress-activated kinase involved in tolerance to glucose starvation. Induces cell-cell detachment by increasing F-actin conversion to G-actin. Expression is induced by CD95 or TNF-alpha, via NF-kappa-B. Protects cells from CD95-mediated apoptosis and is required for the increased motility and invasiveness of CD95-activated tumor cells. Able to phosphorylate 'Ser-464' of LATS1.[UniProtKB/Swiss-Prot Function]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .

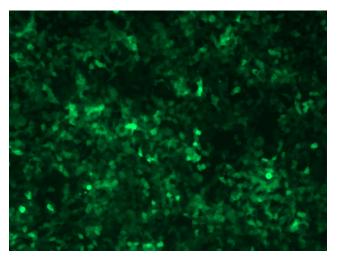

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### STATE ORIGENE NUAK2 Human shRNA Lentiviral Particle (Locus ID 81788) – TL320737V

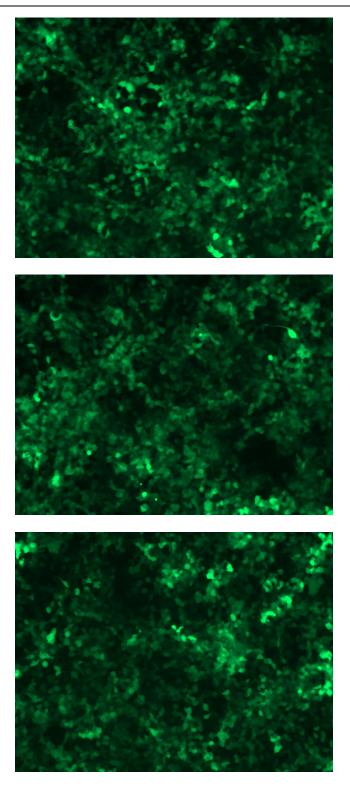

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

#### **Product images:**

GFP signal was observed under microscope at 48 hours after transduction of TL320737A virus into HEK293 cells. TL320737A virus was prepared using lenti-shRNA TL320737A and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of TL320737B virus into HEK293 cells. TL320737B virus was prepared using lenti-shRNA TL320737B and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL320737C] virus into HEK293 cells. [TL320737C] virus was prepared using lenti-shRNA [TL320737C] and [TR30037] packaging kit.

GFP signal was observed under microscope at 48 hours after transduction of [TL320737D] virus into HEK293 cells. [TL320737D] virus was prepared using lenti-shRNA [TL320737D] and [TR30037] packaging kit.
