Product datasheet for TL320988

XAGE1 (XAGE1B) Human shRNA Plasmid Kit (Locus ID 653220)

Product data:

Product Type:	shRNA Plasmids
Product Name:	XAGE1 (XAGE1B) Human shRNA Plasmid Kit (Locus ID 653220)
Locus ID:	653220
Synonyms:	CT12.1; CT12.1A; CT12.1B; CTP9; GAGED2; XAGE-1; XAGE1; XAGE1B
Vector:	pGFP-C-shLenti (TR30023)
E. coli Selection:	Chloramphenicol (34 ug/ml)
Mammalian Cell Selection:	Puromycin
Format:	Lentiviral plasmids
Components:	XAGE1B - Human, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 653220). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.
RefSeq:	<u>NM 001097594, NM 001097595, NM 001097596, NR 033254, NM 001097596.1, NM 001097596.2, NM 001097594.1, NM 001097594.2, NM 001097595.1, NM 001097596.3, NM 001097594.3</u>
UniProt ID:	<u>Q9HD64</u>
Summary:	This gene is a member of the XAGE subfamily, which belongs to the GAGE family. The GAGE genes are expressed in a variety of tumors and in some fetal and reproductive tissues. This gene is strongly expressed in Ewing's sarcoma, alveolar rhabdomyosarcoma and normal testis. The protein encoded by this gene contains a nuclear localization signal and shares a sequence similarity with other GAGE/PAGE proteins. Because of the expression pattern and the sequence similarity, this protein also belongs to a family of CT (cancer-testis) antigens. Alternative splicing of this gene, in addition to alternative transcription start sites, results in multiple transcript variants. [provided by RefSeq, Jan 2010]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .

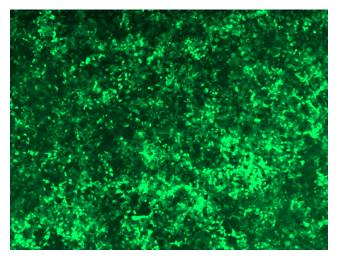

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

SAGE1 (XAGE1B) Human shRNA Plasmid Kit (Locus ID 653220) – TL320988 XAGE1 (XAGE1B) Human shRNA Plasmid Kit (Locus ID 653220) – TL320988

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

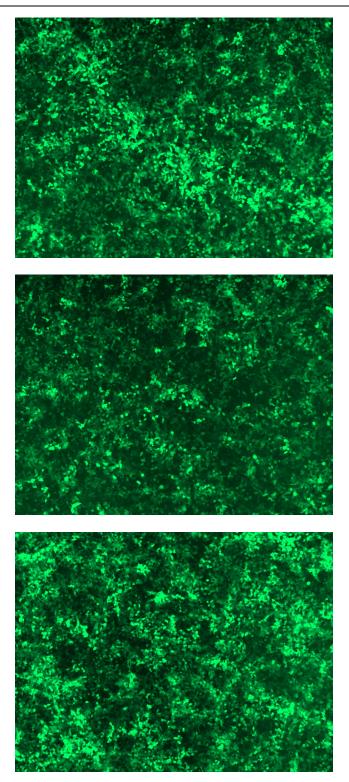

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).

Product images:

GFP signal was observed under microscope at 48 hours after transduction of TL320988A virus into HEK293 cells. TL320988A virus was prepared using lenti-shRNA TL320988A and [TR30037] packaging kit.
