## **Btg2 Mouse shRNA Lentiviral Particle (Locus ID 12227)**

### **Product data:**

**Product Type:** shRNA Lentiviral Particles

**Product Name:** Btg2 Mouse shRNA Lentiviral Particle (Locus ID 12227)

Locus ID: 12227

Synonyms: AA959598; APRO1; Pc3; TIS21

**Vector:** pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

**Components:** Btg2 - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble

control), 0.5 ml each, >10^7 TU/ml.

RefSeq: <u>BC132259</u>, <u>NM 007570</u>, <u>NM 007570.1</u>, <u>NM 007570.2</u>, <u>BC138639</u>

UniProt ID: Q04211

**Summary:** Anti-proliferative protein; the function is mediated by association with deadenylase subunits

of the CCR4-NOT complex. Activates mRNA deadenylation in a CNOT6 and CNOT7-dependent manner. In vitro can inhibit deadenylase activity of CNOT7 and CNOT8. Involved in cell cycle regulation. Could be involved in the growth arrest and differentiation of the neuronal

precursors. Modulates transcription regulation mediated by ESR1. Involved in mitochondrial

depolarization and neurite outgrowth (By similarity).[UniProtKB/Swiss-Prot Function]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

# Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
