

Product datasheet for **TL500356V**

Cflar Mouse shRNA Lentiviral Particle (Locus ID 12633)

Product data:

| | |
|---------------|---|
| Product Type: | shRNA Lentiviral Particles |
| Product Name: | Cflar Mouse shRNA Lentiviral Particle (Locus ID 12633) |
| Locus ID: | 12633 |
| Synonyms: | 2310024N18Rik; A430105C05Rik; c-Flip; Cash; Casper; CLARP; ENSMUSG00000072980; FLAME; FLAME-1; Flip |
| Vector: | pGFP-C-shLenti (TR30023) |
| Format: | Lentiviral particles |
| Components: | Cflar - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 ⁷ TU/ml. |
| RefSeq: | BC023121 , BC029223 , NM_001289704 , NM_001293804 , NM_001293805 , NM_009805 , NM_207653 , NR_110361 , NM_001355056 , NR_149255 , NR_149256 , NR_149257 , NR_149258 , NM_009805.1 , NM_009805.2 , NM_009805.3 , NM_009805.4 , NM_207653.1 , NM_207653.2 , NM_207653.3 , NM_207653.4 , NM_207653.5 , NM_001293804.1 , NM_001293805.1 , NM_001289704.1 , NM_001289704.2 , BC085105 , NM_001293805.2 , NM_001289704.3 , NM_207653.6 , NM_001293804.2 |
| UniProt ID: | O35732 |
| Summary: | Apoptosis regulator protein which may function as a crucial link between cell survival and cell death pathways in mammalian cells. Acts as an inhibitor of TNFRSF6 mediated apoptosis. A proteolytic fragment (p43) is likely retained in the death-inducing signaling complex (DISC) thereby blocking further recruitment and processing of caspase-8 at the complex. Full length and shorter isoforms have been shown either to induce apoptosis or to reduce TNFRSF-triggered apoptosis. Lacks enzymatic (caspase) activity (By similarity).[UniProtKB/Swiss-Prot Function] |
| shRNA Design: | These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com . If you need a special design or shRNA sequence, please utilize our custom shRNA service . |

**Performance
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
