

## **Product datasheet for TL501074**

## Troduct dutasifect for TESOTO74

## Il17a Mouse shRNA Plasmid (Locus ID 16171)

**Product Type:** shRNA Plasmids

**Product Name:** Il17a Mouse shRNA Plasmid (Locus ID 16171)

**Locus ID:** 16171

Synonyms: Ctl; Ctla; Ctla-8; Ctla8; II; IL-17; IL-17A; II17

**Vector:** pGFP-C-shLenti (TR30023)

E. coli Selection: Chloramphenicol (34 ug/ml)

**Mammalian Cell** 

**Product data:** 

Selection:

Puromycin

Format: Lentiviral plasmids

**Components:** Il17a - Mouse, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 16171).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

RefSeq: <u>BC119303</u>, <u>BC119309</u>, <u>NM 010552</u>, <u>NM 010552.1</u>, <u>NM 010552.2</u>, <u>NM 010552.3</u>

UniProt ID: Q62386

**Summary:** This gene encodes a pro-inflammatory cytokine that is a member of the interleukin-17 family.

The encoded protein plays a central role in host defense against diverse pathogens. The encoded protein is produced by activated T-cells and certain cell types of innate immune system. The active protein functions as either a homodimer with other interleukin-17 family members and signals through the interleukin-17 receptor to induce inflammatory cytokine production. Aberrant expression of this gene is associated with autoinflammatory diseases including rheumatoid arthritis, psoriasis and multiple sclerosis. [provided by RefSeq, Sep

2015]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

## Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
