| Product Type:                | shRNA Plasmids   |
|------------------------------|--|
| Product Name:                | Mmel1 Mouse shRNA Plasmid (Locus ID 27390)   |
| Locus ID:                    | 27390  |
| Synonyms:                    | Mell1; NEP2; NEPII; NI1; SEP   |
| Vector:                      | pGFP-C-shLenti (TR30023)   |
| E. coli Selection:           | Chloramphenicol (34 ug/ml)   |
| Mammalian Cell<br>Selection: | Puromycin  |
| Format:                      | Lentiviral plasmids  |
| Components:                  | Mmel1 - Mouse, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 27390).<br>5µg purified plasmid DNA per construct<br>29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.   |
| RefSeq:                      | <u>NM 013783, NM 013783.1, NM 013783.2, BC137649, BC144804</u>   |
| UniProt ID:                  | <u>Q9JLI3</u>  |
| Summary:                     | Metalloprotease involved in sperm function, possibly by modulating the processes of<br>fertilization and early embryonic development. Degrades a broad variety of small peptides<br>with a preference for peptides shorter than 3 kDa containing neutral bulky aliphatic or<br>aromatic amino acid residues. Shares the same substrate specificity with MME and cleaves<br>peptides at the same amide bond.[UniProtKB/Swiss-Prot Function] |
| shRNA Design:                | These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> .<br>If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** Mmel1 Mouse shRNA Plasmid (Locus ID 27390) – TL502698

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
