

Product datasheet for **TL505601V**

Acacb Mouse shRNA Lentiviral Particle (Locus ID 100705)

Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	Acacb Mouse shRNA Lentiviral Particle (Locus ID 100705)
Locus ID:	100705
Synonyms:	Acc2; Accb; AI597064; AW743042
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	Acacb - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 ⁷ TU/ml.
RefSeq:	NM_133904 , NM_133904.1 , NM_133904.2 , BC022940
UniProt ID:	E9Q4Z2
Summary:	Catalyzes the ATP-dependent carboxylation of acetyl-CoA to malonyl-CoA (By similarity). Carries out three functions: biotin carboxyl carrier protein, biotin carboxylase and carboxyltransferase (By similarity). Involved in inhibition of fatty acid and glucose oxidation and enhancement of fat storage (PubMed:11283375, PubMed:12920182, PubMed:15677334, PubMed:18487439, PubMed:22362781). May play a role in regulation of mitochondrial fatty acid oxidation through malonyl-CoA-dependent inhibition of carnitine palmitoyltransferase 1 (PubMed:10677481).[UniProtKB/Swiss-Prot Function]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com . If you need a special design or shRNA sequence, please utilize our custom shRNA service .

**Performance
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
