

# Product datasheet for TL506084

# Acbd3 Mouse shRNA Plasmid (Locus ID 170760)

## **Product data:**

#### **Product Type:** shRNA Plasmids **Product Name:** Acbd3 Mouse shRNA Plasmid (Locus ID 170760) Locus ID: 170760 60kDa; 8430407011Rik; D1Ertd10e; GCP60; Gocap1; GOLPH1; Pap7 Synonyms: pGFP-C-shLenti (TR30023) Vector: E. coli Selection: Chloramphenicol (34 ug/ml) Mammalian Cell Puromycin Selection: Format: Lentiviral plasmids Acbd3 - Mouse, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 170760). **Components:** 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free. BC060602, NM 133225, NM 133225.1, NM 133225.2, NM 133225.3, BC050121 RefSeq: **UniProt ID:** O8BMP6 Involved in the maintenance of Golgi structure by interacting with giantin, affecting protein Summary: transport between the endoplasmic reticulum and Golgi (By similarity). Involved in hormoneinduced steroid biosynthesis in testicular Leydig cells (PubMed:12711385). Recruits PI4KB to the Golgi apparatus membrane; enhances the enzyme activity of PI4KB activity via its membrane recruitment thereby increasing the local concentration of the substrate in the vicinity of the kinase (By similarity).[UniProtKB/Swiss-Prot Function] These shRNA constructs were designed against multiple splice variants at this gene locus. To shRNA Design: be certain that your variant of interest is targeted, please contact techsupport@origene.com. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

### **CRIGENE** Acbd3 Mouse shRNA Plasmid (Locus ID 170760) – TL506084

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
