

Product datasheet for TL506169V

Socs7 Mouse shRNA Lentiviral Particle (Locus ID 192157)

Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	Socs7 Mouse shRNA Lentiviral Particle (Locus ID 192157)
Locus ID:	192157
Synonyms:	2310063P06Rik; C85125; Nap4
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	Socs7 - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml.
RefSeq:	<u>NM 138657, NM 138657.1, NM 138657.2, NM 138657.3, BC169222</u>
UniProt ID:	Q8VHQ2
Summary:	Regulates signaling cascades probably through protein ubiquitination and/or sequestration.
	Functions in insulin signaling and glucose homeostasis through IRS1 ubiquitination and subsequent proteasomal degradation. Inhibits also prolactin, growth hormone and leptin signaling by preventing STAT3 and STAT5 activation, sequestering them in the cytoplasm and reducing their binding to DNA. May be a substrate recognition component of a SCF-like E3 ubiquitin-protein ligase complex which mediates the ubiquitination and subsequent proteasomal degradation of target proteins (By similarity).[UniProtKB/Swiss-Prot Function]

Socs7 Mouse shRNA Lentiviral Particle (Locus ID 192157) – TL506169V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
