

## **Product datasheet for TL509636**

## Scg5 Mouse shRNA Plasmid (Locus ID 20394)

**Product data:** 

**Product Type:** shRNA Plasmids

**Product Name:** Scg5 Mouse shRNA Plasmid (Locus ID 20394)

**Locus ID:** 20394

**Synonyms:** 7B2; Al325031; Sgne-1; Sgne1

**Vector:** pGFP-C-shLenti (TR30023)

E. coli Selection: Chloramphenicol (34 ug/ml)

**Mammalian Cell** 

Selection:

Puromycin

Format: Lentiviral plasmids

**Components:** Scg5 - Mouse, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 20394).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

RefSeq: <u>BC029021</u>, <u>NM 009162</u>, <u>NM 009162.1</u>, <u>NM 009162.2</u>, <u>NM 009162.3</u>

UniProt ID: P12961

**Summary:** Acts as a molecular chaperone for PCSK2/PC2, preventing its premature activation in the

regulated secretory pathway. Binds to inactive PCSK2 in the endoplasmic reticulum and facilitates its transport from there to later compartments of the secretory pathway where it is proteolytically matured and activated. Also required for cleavage of PCSK2 but does not appear to be involved in its folding. Plays a role in regulating pituitary hormone secretion.

The C-terminal peptide inhibits PCSK2 in vitro.[UniProtKB/Swiss-Prot Function]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

## Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
