## Cldn23 Mouse shRNA Lentiviral Particle (Locus ID 71908)

## Product data:

Product Type:
Product Name:
Locus ID:
Synonyms:
Vector:
Format:
Components:

RefSeq:
UniProt ID:
Summary:
shRNA Design:

shRNA Lentiviral Particles

Cldn23 Mouse shRNA Lentiviral Particle (Locus ID 71908)
71908
2310014B08Rik
pGFP-C-shLenti (TR30023)
Lentiviral particles
Cldn23 - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, $>10 \wedge 7 \mathrm{TU} / \mathrm{ml}$.

BC019534, BC085262, NM 027998, NM 027998.1 NM 027998.2 NM 027998.3 NM 027998.4 Q9D7D7

This gene encodes a member of the claudin family. Claudins are integral membrane proteins and components of tight junction strands. Tight junction strands serve as a physical barrier to prevent solutes and water from passing freely through the paracellular space between epithelial or endothelial cell sheets, and also play critical roles in maintaining cell polarity and signal transductions. This gene is intronless and the protein encoded by this gene is $77 \%$ identical to the human homolog. [provided by RefSeq, Aug 2010]
These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

## Performance <br> Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with $100 \%$ identity. One of the four constructs at minimum are guaranteed to produce $70 \%$ or more gene expression knock-down provided a minimum transfection efficiency of $80 \%$ is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
