

Product datasheet for TL511611

Akt3 Mouse shRNA Plasmid (Locus ID 23797)

Product data:

Product Type: shRNA Plasmids

Product Name: Akt3 Mouse shRNA Plasmid (Locus ID 23797)

Locus ID: 23797

Synonyms: Al851531; D930002M15Rik; Nmf350

Vector: pGFP-C-shLenti (TR30023)

E. coli Selection: Chloramphenicol (34 ug/ml)

Mammalian Cell

Selection:

Puromycin

Format: Lentiviral plasmids

Components: Akt3 - Mouse, 4 unique 29mer shRNA constructs in lentiviral GFP vector(Gene ID = 23797).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-C-shLenti Vector, TR30021, included for free.

RefSeq: <u>BC066861, NM 011785, NM 011785.1, NM 011785.2, NM 011785.3</u>

UniProt ID: Q9WUA6

Summary: AKT3 is one of 3 closely related serine/threonine-protein kinases (AKT1, AKT2 and AKT3)

called the AKT kinase, and which regulate many processes including metabolism,

proliferation, cell survival, growth and angiogenesis. This is mediated through serine and/or

threonine phosphorylation of a range of downstream substrates. Over 100 substrate

candidates have been reported so far, but for most of them, no isoform specificity has been

reported. AKT3 is the least studied AKT isoform. It plays an important role in brain

development and is crucial for the viability of malignant glioma cells. AKT3 isoform may also be the key molecule in up-regulation and down-regulation of MMP13 via IL13. Required for the coordination of mitochondrial biogenesis with growth factor-induced increases in cellular

energy demands. Down-regulation by RNA interference reduces the expression of the phosphorylated form of BAD, resulting in the induction of caspase-dependent apoptosis.

[UniProtKB/Swiss-Prot Function]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
