Ppp2r2d Mouse shRNA Lentiviral Particle (Locus ID 52432)

Product data:

Product Type: shRNA Lentiviral Particles

Product Name: Ppp2r2d Mouse shRNA Lentiviral Particle (Locus ID 52432)

Locus ID: 52432

Synonyms: 1300017E19Rik; D7Ertd753e; MDS026

Vector: pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

Components: Ppp2r2d - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1

scramble control), 0.5 ml each, >10^7 TU/ml.

RefSeq: <u>BC066022</u>, <u>NM 001347618</u>, <u>NM 026391</u>, <u>NM 026391.1</u>, <u>NM 026391.2</u>

UniProt ID: Q925E7

Summary: B regulatory subunit of protein phosphatase 2A (PP2A) that plays a key role in cell cycle by

controlling mitosis entry and exit. The activity of PP2A complexes containing PPP2R2D (PR55-delta) fluctuate during the cell cycle: the activity is high in interphase and low in mitosis. During mitosis, activity of PP2A is inhibited via interaction with phosphorylated ENSA and ARPP19 inhibitors. Within the PP2A complexes, the B regulatory subunits modulate substrate selectivity and catalytic activity, and also may direct the localization of the catalytic enzyme to

a particular subcellular compartment (By similarity).[UniProtKB/Swiss-Prot Function]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

Ppp2r2d Mouse shRNA Lentiviral Particle (Locus ID 52432) - TL516911V

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
