Atp13a3 Mouse shRNA Lentiviral Particle (Locus ID 224088)

Product data:

Product Type: shRNA Lentiviral Particles

Product Name: Atp13a3 Mouse shRNA Lentiviral Particle (Locus ID 224088)

Locus ID: 224088

Synonyms: AU022875; Gm541; Gm542; Gm1745

Vector: pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

Components: Atp13a3 - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble

control), 0.5 ml each, >10^7 TU/ml.

RefSeq: NM 001128094, NM 001128096, NM 001128094.1, NM 001128096.1

UniProt ID: Q5XF89

Summary: ATP-driven pump involved in endocytosis-dependent polyamine transport. Uses ATP as an

energy source to transfer polyamine precursor putrescine from the endosomal compartment

to the cytosol.[UniProtKB/Swiss-Prot Function]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact $\underline{\mathsf{techsupport}} \underline{\mathsf{oorigene.com}}.$

If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

be used in comparison with the target-specific shRNA transfected samples.

Performance

Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
