Polr1d Mouse shRNA Lentiviral Particle (Locus ID 20018)

Product data:

Product Type: shRNA Lentiviral Particles

Product Name: Polr1d Mouse shRNA Lentiviral Particle (Locus ID 20018)

Locus ID: 20018

Synonyms: 16kD; 1110003G10Rik; AC19; mRP; RPA16; Rpo; Rpo1-3

Vector: pGFP-C-shLenti (TR30023)

Format: Lentiviral particles

Components: Rpo1 - Mouse shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble

control), 0.5 ml each, >10^7 TU/ml.

RefSeq: BC002025, BC024394, BC087884, NM 009087, NM 181730, NM 181730.1, NM 181730.2,

NM 181730.3, NM 181730.4, NM 009087.1, NM 009087.2, BM948930

UniProt ID: P97304

Summary: This gene encodes an RNA polymerase subunit that is a component of both the RNA

polymerase I and RNA polymerase III complexes. RNA polymerase I is associated with

transcription of pre-ribosomal RNAs, while RNA polymerase III is associated with transcription

of small RNAs. Pseudogenes of this gene have been defined on chromosomes 4 and 6. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2013]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
