

Product datasheet for **TL708116V**

Ttc19 Rat shRNA Lentiviral Particle (Locus ID 691506)

Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	Ttc19 Rat shRNA Lentiviral Particle (Locus ID 691506)
Locus ID:	691506
Synonyms:	RGD1311797
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	Ttc19 - Rat shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 ⁷ TU/ml.
RefSeq:	NM_001109644 , NM_001109644.1
UniProt ID:	D4A6D7
Summary:	Required for the preservation of the structural and functional integrity of mitochondrial respiratory complex III by allowing the physiological turnover of the Rieske protein UQCRCF1. Involved in the clearance of UQCRCF1 N-terminal fragments, which are produced upon incorporation into the complex III and whose presence is detrimental for its catalytic activity. [UniProtKB/Swiss-Prot Function]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com . If you need a special design or shRNA sequence, please utilize our custom shRNA service .

**Performance
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
