

## Product datasheet for **TL708154V**

### Eno1 Rat shRNA Lentiviral Particle (Locus ID 24333)

#### Product data:

Product Type:	shRNA Lentiviral Particles
Product Name:	Eno1 Rat shRNA Lentiviral Particle (Locus ID 24333)
Locus ID:	24333
Synonyms:	Nne
Vector:	pGFP-C-shLenti (TR30023)
Format:	Lentiviral particles
Components:	Eno1 - Rat shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10 <sup>7</sup> TU/ml.
RefSeq:	<a href="#">NM_001109908</a> , <a href="#">NM_012554</a> , <a href="#">NM_001109908.1</a> , <a href="#">NM_012554.1</a> , <a href="#">NM_012554.2</a> , <a href="#">BC063174</a> , <a href="#">BC078896</a> , <a href="#">BC081847</a> , <a href="#">BC090069</a> , <a href="#">BC091572</a> , <a href="#">BC097343</a>
UniProt ID:	<a href="#">P04764</a>
Summary:	Multifunctional enzyme that, as well as its role in glycolysis, plays a part in various processes such as growth control, hypoxia tolerance and allergic responses. May also function in the intravascular and pericellular fibrinolytic system due to its ability to serve as a receptor and activator of plasminogen on the cell surface of several cell-types such as leukocytes and neurons. Stimulates immunoglobulin production.[UniProtKB/Swiss-Prot Function]
shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <a href="mailto:techsupport@origene.com">techsupport@origene.com</a> . If you need a special design or shRNA sequence, please utilize our <a href="#">custom shRNA service</a> .

**Performance  
Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
