

# Product datasheet for TL711085V

# Nptxr Rat shRNA Lentiviral Particle (Locus ID 81005)

## **Product data:**

#### **Product Type:** shRNA Lentiviral Particles **Product Name:** Nptxr Rat shRNA Lentiviral Particle (Locus ID 81005) Locus ID: 81005 Synonyms: Npr Vector: pGFP-C-shLenti (TR30023) Format: Lentiviral particles **Components:** Nptxr - Rat shRNA lentiviral particles (4 unique 29mer target-specific shRNA, 1 scramble control), 0.5 ml each, >10^7 TU/ml. **RefSeq:** NM 030841, NM 030841.1, NM 030841.2, NM 030841.3 Summary: The protein encoded by this gene is an integral membrane protein, and functions as a neuronal receptor. It is thought to mediate neuronal uptake of the snake venom toxin, taipoxin, and its transport into the synapses. Studies in rat indicate that translation of this mRNA initiates at a non-AUG (CUG) codon. This site is also conserved in human and mouse. [provided by RefSeq, Jul 2008] shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

### CRIGENE Nptxr Rat shRNA Lentiviral Particle (Locus ID 81005) – TL711085V

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
