CDK5 (NM_004935) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human cyclin-dependent kinase 5 (CDK5), 1 mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC200342 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

LQHPYFSDFCPP

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 33.1 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 004926

Locus ID: 1020

CDK5 (NM_004935) Human Recombinant Protein - TP300342L

UniProt ID: <u>Q00535</u>, <u>A0A090N7W4</u>

RefSeq Size: 1211
Cytogenetics: 7q36.1
RefSeq ORF: 876

Synonyms: LIS7; PSSALRE

Summary: This gene encodes a proline-directed serine/threonine kinase that is a member of the cyclin-

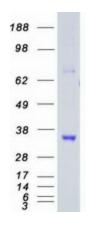

dependent kinase family of proteins. Unlike other members of the family, the protein encoded by this gene does not directly control cell cycle regulation. Instead the protein, which is predominantly expressed at high levels in mammalian postmitotic central nervous system neurons, functions in diverse processes such as synaptic plasticity and neuronal migration through phosphorylation of proteins required for cytoskeletal organization, endocytosis and

exocytosis, and apoptosis. In humans, an allelic variant of the gene that results in undetectable levels of the protein has been associated with lethal autosomal recessive lissencephaly-7. Alternative splicing results in multiple transcript variants. [provided by

RefSeq, May 2015]

Protein Families: Druggable Genome, Protein Kinase
Protein Pathways: Alzheimer's disease, Axon guidance

Product images:

Coomassie blue staining of purified CDK5 protein (Cat# [TP300342]). The protein was produced from HEK293T cells transfected with CDK5 cDNA clone (Cat# [RC200342]) using MegaTran 2.0 (Cat# [TT210002]).
