### CD70 (NM 001252) Human Recombinant Protein

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Recombinant protein of human CD70 molecule (CD70), 20 μg

Species: Human
Expression Host: HEK293T

**Expression cDNA Clone** >RC200410 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

**TRTRPLEQKLISEEDLAANDILDYKDDDDKV** 

Tag: C-Myc/DDK
Predicted MW: 20.9 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

**Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining

**Buffer:** 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

**Bioactivity:** In vitro binding assay (PMID: 25730144)

**Preparation:** Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

**Note:** For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 001243

Locus ID: 970

#### CD70 (NM\_001252) Human Recombinant Protein - TP300410

**UniProt ID:** P32970

RefSeq Size: 913

Cytogenetics: 19p13.3 RefSeq ORF: 579

Synonyms: CD27-L; CD27L; CD27LG; LPFS3; TNFSF7; TNLG8A

**Summary:** The protein encoded by this gene is a cytokine that belongs to the tumor necrosis factor

> (TNF) ligand family. This cytokine is a ligand for TNFRSF27/CD27. It is a surface antigen on activated, but not on resting, T and B lymphocytes. It induces proliferation of costimulated T cells, enhances the generation of cytolytic T cells, and contributes to T cell activation. This cytokine is also reported to play a role in regulating B-cell activation, cytotoxic function of

natural killer cells, and immunoglobulin sythesis. [provided by RefSeq, Jul 2008]

**Protein Families:** ES Cell Differentiation/IPS, Transmembrane

**Protein Pathways:** Cytokine-cytokine receptor interaction

The binding affinity values of IgG and DuetMab with amino acid residue substitutions of the heavy chain and kappa light chain variable domains and their combinations of some of the substitutions to CD4 and CD70 (OriGene TP300410), as measured using an Octet384 instrument. Figure cited from MAbs, PMID: 25730144

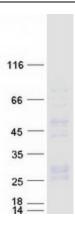

Kinetic measurements to soluble monomeric forms of CD4 and CD70 were carried out using an Octet384 instrument. The dissociation constants, Ko. were calculated as the ratio of  $k_{\text{off}}/k_{\text{on}}$  from a non-linear fit of the data

Binding measured against CD70

Binding measured against CD4

No measurable binding could be seen

Coomassie blue staining of purified CD70 protein (Cat# TP300410). The protein was produced from HEK293T cells transfected with CD70 cDNA clone (Cat# [RC200410]) using MegaTran 2.0 (Cat# [TT210002]).
