#### PEX16 (NM\_004813) Human Recombinant Protein - TP301115L

UniProt ID: Q9Y5Y5

RefSeq Size: 1929 Cytogenetics: 11p11.2 RefSeq ORF: 1008

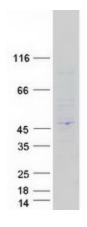

Synonyms: PBD8A; PBD8B

**Summary:** The protein encoded by this gene is an integral peroxisomal membrane protein. An inactivating

nonsense mutation localized to this gene was observed in a patient with Zellweger syndrome of the complementation group CGD/CG9. Expression of this gene product morphologically and biochemically restores the formation of new peroxisomes, suggesting a role in peroxisome organization and biogenesis. Alternative splicing has been observed for this gene and two

variants have been described. [provided by RefSeq, Jul 2008]
