

Product datasheet for TP301119L

DUSP3 (NM_004090) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins Recombinant protein of human dual specificity phosphatase 3 (DUSP3), 1 mg **Description:** Species: Human HEK293T **Expression Host:** Expression cDNA Clone >RC201119 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s) MSGSFELSVQDLNDLLSDGSGCYSLPSQPCNEVTPRIYVGNASVAQDIPKLQKLGITHVLNAAEGRSFMH VNTNANFYKDSGITYLGIKANDTQEFNLSAYFERAADFIDQALAQKNGRVLVHCREGYSRSPTLVIAYLM MRQKMDVKSALSIVRQNREIGPNDGFLAQLCQLNDRLAKEGKLKP **SGPTRTRPL**EQKLISEEDLAANDILDYKDDDDKV C-Myc/DDK Tag: Predicted MW: 20.3 kDa **Concentration:** >0.05 µg/µL as determined by microplate BCA method **Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol Recombinant protein was captured through anti-DDK affinity column followed by Preparation: conventional chromatography steps. Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Storage: Store at -80°C. Stability: Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles. **RefSeq:** NP 004081 Locus ID: 1845 **UniProt ID:** P51452 **RefSeq Size:** 4139

	SP3 (NM_004090) Human Recombinant Protein – TP301119L	
Cytogenetics:	17q21.31	
RefSeq ORF:	555	
Synonyms:	VHR	
Summary:	The protein encoded by this gene is a member of the dual specificity protein phosphatase subfamily. These phosphatases inactivate their target kinases by dephosphorylating both the phosphoserine/threonine and phosphotyrosine residues. They negatively regulate members of the mitogen-activated protein (MAP) kinase superfamily (MAPK/ERK, SAPK/JNK, p38), which are associated with cellular proliferation and differentiation. Different members of the family of dual specificity phosphatases show distinct substrate specificities for various MAP kinases, different tissue distribution and subcellular localization, and different modes of inducibility of their expression by extracellular stimuli. This gene maps in a region that contains the BRCA1 locus which confers susceptibility to breast and ovarian cancer. Although DUSP3 is expressed in both breast and ovarian tissues, mutation screening in breast cancer pedigrees and in sporadic tumors was negative, leading to the conclusion that this gene is not BRCA1. [provided by RefSeq, Jul 2008]	
Protein Families:	Druggable Genome, Phosphatase	
Protein Pathway	s: MAPK signaling pathway

Coomassie blue staining of purified DUSP3 protein (Cat# [TP301119]). The protein was produced from HEK293T cells transfected with DUSP3 cDNA clone (Cat# [RC201119]) using MegaTran 2.0 (Cat# [TT210002]).
